## Epoxy Based Industrial Paints & Barrel Coatings:-

Our Product line include:-

### A) Epoxy Based Paint

**1) Air Drying Paints and Primers:-**

Available in two pack system ie base + hardener (3 : 1)

**2) Stoving Paints and Primers:-**

Available in single pack system

**3) Sunshine Epoxy Thinner ST310:-**

Suitable for Epoxy based paints

### B) Epoxy Based Barrel Coatings

**1) Sunshine Epoxy PC11:**

Formulated to get optimum chemical resistance for the storage of Solvent, light detergents and light chemicals.

**2) Sunshine Epoxy No. 8 High Chemical Resistant Lacquer:**

This is a specialized product developed for high chemical resistance.

**3) Sunshine Epoxy No. 9 Suitable for food storage Barrel Coating:**

This product is developed to get tough film suitable for storage of Food Items. This does not contain arsenic, hazardous resins or chemicals.

**4) Sunshine No. 6 Seaming Compound:**

This product is developed to get tough film suitable for storage of Food Items. This does not contain arsenic, hazardous resins or chemicals. The product is used by barrel and drum manufacturers for barrel and drums seaming purpose.

**5) Sunshine Epoxy Thinner ST315:**

Suitable for Sunshine Epoxy No. 8 High Chemical Resistant Lacquer

## Alkyd Based Industrial Paints:-

Our Product line include:-

### 1) Air Drying Enamel Paints and Primers:

Based on alkyd resin and suitable pigments to obtain desired IS paint shade as per customer requirement. Formulated to achieve optimum finish and film properties like gloss and adhesion.

### 2) Fast Drying Enamel Paints and Primers:

Similar to Air Drying type this also includes suitable catalyst to achieve accelerated film drying. Formulated primarily to achieve optimum drying time.

### 3) Stoving Enamel Paints and Primers:

Similar to Air Drying type this also Includes suitable catalyst to achieve accelerated film drying

### 4) Sunshine GP Thinner:

Suitable GP Thinner available for above enamel paints and primers.

## Vacuum Metalizing Varnishes:-

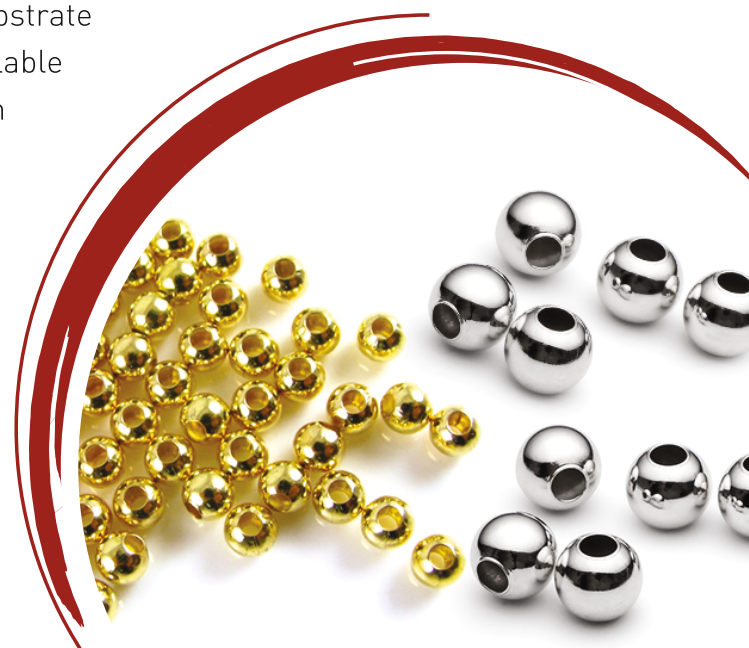

Our Product line in Vacuum Metalizing Varnish include

### 1) Base Coat:

Used for silver coating using vacuum metallization process. To facilitate the adhesion of the metalized layer and obtain desired finish BASE COAT is first applied to the substrate prior to vacuum metallization process. This is available in various viscosities for specific type of application

### 2) Top Coat:

Used for golden coating using vacuum metallization process. To facilitate coloring of metalized items as well as for protection of metalized coating and prevent flaking Top Coat is applied on the metalized surface.

## About us

SUNSHINE ENTERPRISES is engaged in manufacturing of industrial paints, barrel coatings , seaming compounds , metalizing lacquer and thinner. We supply to diversified industries like barrel manufacturers, food packaging and various machine manufacturers. Our company was established in 1995 and along with it's management has an experience of nearly 30 years in manufacturing Paints & Thinner. Our manufacturing facilities are located at 2 locations at Vasai which is located near the city of Mumbai ( India ).

### ASSURANCE OF QUALITY AND ECONOMY.

We at SUNSHINE ENTERPRISES are quiet stringent when it comes to procurement of Raw Materials, sourcing from reputed organisations/refineries which deliver the best of the class in petrochemical products. We ensure that every batch of product is checked for quality before it is delivered to our values customer. We at SUNSHINE ENTERPRISES provide best quality products at competitive prices and give foremost importance to customer satisfaction.

- 1 . We ensure that every batch of product is checked for quality before it is delivered to our values customer
- 2 . We at SUNSHINE ENTERPRISES provide best quality products at competitive prices and give foremost importance to customer satisfaction.

## Applications

- Drums
- Barrels
- Coatings for Storage of Food Items
- Chemical Resistant Coatings for Storage of various chemicals
- Machinery Coatings
- Vacuum Metallizing
